2. Evaluation of the team leader

Team leader was great. He led the team very well and gave us tasks according to our skills. I believe the distribution was fair and great for us. He also gave me some tasks that helped me learn more about team working and software engineering

3. Work done by me

I was responsible for some of diagrams. I did the Deployment Diagram, some of State Diagrams and helped Orges with Use Cases. I did coding a lot for the front page and editing.

I was responsible about the database also. Maintaining data and backups. I also helped with the Documentation.

I did some sketches too.
