2. Evaluation of the team leader

I think the leader did a good job. He motivated the team and distributed the tasks based on our abilities. Each member was given a fair work to do. I believe the team worked good and we achieved a good result in the end.

3. Work done by me

I was responsible for the design part. I had some ideas how should the front page will look that the guys developed. After creating the designs, I gave my contribution for Object Diagram and Db Schema. I also did some of user scenarios with Orges.
In coding tasks, I had to design the Team Page and the front page with html and css.
